

St Louis Catholic Primary School Vision and Values

Vision Statement

We are a forward-thinking Catholic school aiming to instil within each child a passion and curiosity for life-long learning to equip them to achieve their true potential in a rapidly changing world. Children, parents, staff and governors will work in partnership to recognise and nurture the uniqueness of each child so that they will develop into caring, compassionate and confident citizens.

School Ethos and Values

At St Louis Catholic Primary School we aim for our children to grow into the people God wants them to be. This includes achieving their true potential which may include success in academic subjects, sports, technology, music and the arts. We will support our pupils to become well rounded, thoughtful and caring children who respect the needs and rights of others in our diverse community. Learning is at the heart of our school and we have the commitment of a dedicated team of staff, supportive parents and governors and pupils who are proud to belong to our school family.

We follow an **ABC** approach to the curriculum:

Ambitious: we want the best for our pupils and will always have the highest expectations

Brave: we want our children to feel safe to take risks in order to grow

Caring: we want our children to care for themselves, one another and God's world

The school mission statement is:

'We work together, we pray together, we grow together'

This summarises our belief in the importance of being at one with God and the partnership between home, school and parish. It reflects our desire for children to reach their academic potential, to develop spiritually and to grow into the people God wants us to be. We are supported in this by our parish priest who takes an active and full part in the life of our school. Our partnership enables us to achieve a family atmosphere providing a secure, happy, learning environment with Christ at the centre of all we do.

'We work together, we pray together, we grow together'
